Subject: Forgotten item for today's agenda

Hi all,

I forgot to mention this in today's call. GWPC recently asked me if there was any interest in participating in IOGCC/GWPCs workgroup on induced seismicity. There are four subject subgroups that they developed and are looking for participation. The subgroups can be found below. Is there any interest from you guys in participating in one or two of these groups?

1. Review of the traffic light decision approach – **Tim Baker** (OK), lead
2. Review of the concept surface motion (or ground movement) rather than (or in addition to) magnitude as a measurement that would lead to more appropriate communication to the public as well a more appropriate measurement for decisions – **Herschel McDivitt** (IN), lead
3. Review of the concept of establishing an information sharing data repository – **Rex Buchanan** (KS) and/or California to take the lead
4. Review of the issues regarding seismic monitoring – **Craig Pearson** (TX) lead

Cheers

Bill
